CTRL FLEET™

Execute. Like never before.

Next-generation Transport Management Solutions.

Bring simplicity and clarity to your logistics operation with a set of purpose-built features.

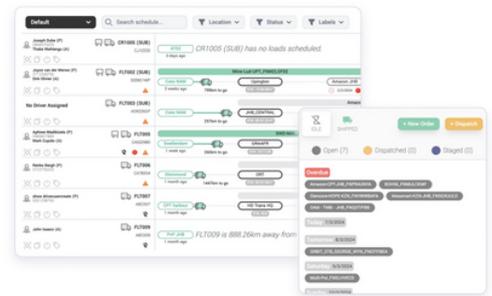

Key Features and Capabilities

CtrlFleet helps you **gain control of your entire fleet operations** from the control room, to your vehicles, drivers and customers.

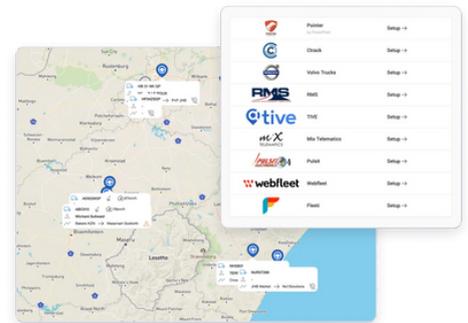

Dynamic Scheduling

Empower your fleet with our intuitive drag-and-drop scheduling system. Assign and rearrange tasks to maximize productivity across your fleet and easily adapt to changes.

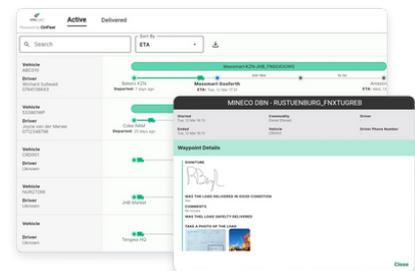

Real Time Monitoring

Stay in the know with a real time monitoring system that leverages live telematics integrations, offering continuous tracking and status updates for your entire fleet.

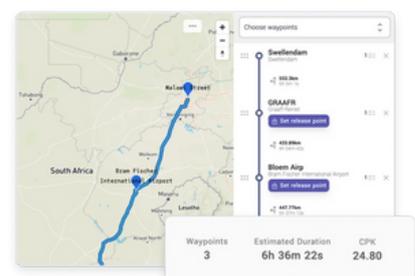

Customer Portal

Strengthen customer trust by sharing an up-to-date tracking link showing order status and vehicle locations for all their active, completed and scheduled orders.

Waypoint Based Orders

Meet customer requirements and manage risk by creating unique, customized workflows per order for a seamless and efficient delivery process.

Driver App

Improve communication with your drivers through CtrlFleet's driver app and execute like never before.

Get required information through custom forms, send specific routing instructions, and receive real-time task updates and e-PODs and sign-on-glass.
