

Preventing drunk driving at the source

Ignition Interlock Solutions

Protect Your Drivers. Secure Your Fleet

At Booze cap, we supply industry leading ignition interlock systems purpose-built for Southern Africa's transport and logistics sector. Our solution combines breath alcohol detection with facial recognition verification to ensure only pre-approved, sober drivers can start a vehicle.

Facial Recognition Driver ID

Confirms driver identity
before test.

Prevents driver
substitution and
unauthorized use.

Real-time image capture
and logging.

Alcohol Breath Detection

Engine remains locked if alcohol is detected.

Fast, accurate, and tamper-resistant.

Meets legal and regulatory standards.

Dashcam Integration-Ready

Fleet Integration

Integrates with existing fleet dashcam systems

Verification Sync

Sync verification images with dashcam footage

Central Video

Centralized video and access control

Fleet management & Reporting

- Optional GPS and data logging.
- Track compliance and lockout events remotely.
- Exportable reports for audits and insurance.

Random Retesting & Safe Response

Performs random breath retests during trips

If alcohol is detected, the booze cap does not switch off the engine

The driver has 6 minutes to safely pull over and switch off the vehicle

Failure to stop triggers the vehicle's alarm system

Emergency Override with Safety Protocols

- -Use-~~once~~ override button for critical access
- Allows the driver to start the vehicle without breath test for a preset period.
- Requires service centre visit before expiry.
- If expired, interlock blocks the vehicle from starting

Built for Commercial Use

Heavy-duty hardware
for trucks, buses, and e-
hailing vehicles

On-site or depot
installation

Multilingual interface &
support.

Who It's For

Why Choose Us

1

Dual-layer driver verification (Face + Breath)

2

Dashcam system compatibility

3

Increased safety and legal compliance

4

Reduced insurance and liability exposure

5

Trusted support across Southern Africa

6

Bulk pricing & maintenance packages available

Our Mission

To protect lives and promote responsible driving by providing reliable, innovative ignition interlock solutions that prevent drunk driving at the source.

We are committed to safer communities through education, technology and integrity.

Call To Action

For years, South Africa's leadership — from the President to the Ministers of Transport and Police — have spoken out about the dangers of drunk driving. But words alone won't save lives.

Booze Cap is stepping up with a practical, preventive solution. We challenge government, insurers, and industry leaders to act — not just talk.

Let's work together to put an end to alcohol-fueled road deaths. Booze Cap is ready. Are you?
